@paulkrugman

For a long time, the geographic battle lines in US politics were pretty much the battle lines of the Civil War. That's no longer true. Trump won Ohio by more than he won Texas; Biden appears to have won Georgia

Die Antwort des Hotels auf Facebook...

...

Dear Social Influencer (I know your name but apparently it's not important to use names),

Thank you for your email looking for free accommodation in return for exposure. It takes a lot of balls to send an email like that, if not much self-respect and dignity.

- *Thank you for your email looking for free accommodation in return for exposure. It takes a lot of balls to send an email like that, if not much self-respect and dignity.*
- *If I let you stay here in return for a feature in your video, who is going to pay the staff who look after you? Who is going to pay the housekeepers who clean your room? The waiters who serve you breakfast? The receptionist who checks you in? Who is going to pay for the light and heat you use during your stay? The laundering of your bed sheets? The water rates? Maybe I should tell my staff they will be featured in your video in lieu of receiving payment for work carried out while you're in residence?*
- Lucky for us, we too have a significant social media following. We have 186k followers on our two Facebook pages, an estimated 80k on our Snapchat, 32k on Instagram and a paltry 12k on our Twitter, but Jesus Christ, I would never in a million years ask anyone for anything for free. I also blog a bit (www.paulvstenson.com), which as far as I'm aware is another way of saying "write stuff on the internet". The above stats do not make me any better than anyone else or afford me the right to not pay for something everyone else has to pay for.

Paul Stenson

P.S. The answer is no.

Hajo Schumacher, Autor Buch „Kein Netz“

Also die **Einfachheit** mit der man im **Netz** ganz normal für **Instagram**, für **Facebook**, für **Twitter**, für **YouTube Fans, Likes, Kommentare kaufen** kann, das ist schon **echt dramatisch**. Ich habe das hier mit einem **Gastronomen** ... besprochen und die sagen z.B., also wenn Du in diesem **klassischen Ranglisten** wie **Tripadvisor**, wo die **Touristen** sich **orientieren**, wenn Du dich da nicht **hochkaufst**, dann hast Du ein **echtes Problem**. Nämlich **weniger Umsatz**. Oder **Ärzte** noch **dramatischer**, wenn Du auf den **bekannten Portalen** eine **schlechte Bewertung** hast , ... eine unter vier von maximal fünf, dann merkst Du das tatsächlich an den **Patienten** die dann auf einmal fragen, **was denn bei Ihnen los** ist oder sowas und **ganz viele Ärzte** haben inzwischen so, ich sag mal **Pauschalverträge mit Agenturen**, die ihnen dann immer mit entsprechenden **Kommentaren und Sternchenvergaben**, die natürlich alle **gefaked** sind, aber sie weiter **im 4,8-Bereich** halten damit dann noch weiter die **Kunden kommen**.
... es hat einen Teil zum mindest von **Volksverarschung**.

In times of **#ClimateEmergency** we use the amount of energy of entire countries to power a digital currency with close to zero use value.

#Bitcoins carbon footprint is already comparable to that of New Zealand, its energy use to Chile. And it is growing. This needs to stop. /1
